Dear Ms. Lally,

Please note the enclosed MSDS's for several of the products you recently requested.

As we discussed, the majority of the items for which you requested MSDS's in your November 8th letter are obsolete, not being manufactured, not being purchased by you, and not referenced by a formula. Many of those I have enclosed have not been manufactured for 5 or more years, or have been replaced.

The following products for which you requested MSDS's, are no longer in our line and no MSDS's are available.

376-46, 467-1-2B, 275-6, 376-15, 663-2-20, 446-3-1, 446-3-2,  
446-3-6 and 443-3-8. Also Catalac 454-3, 999-50A, CA162, X315,  
652-2-7, 653-2-3, 663-7-155 and CA110 as a separate item.

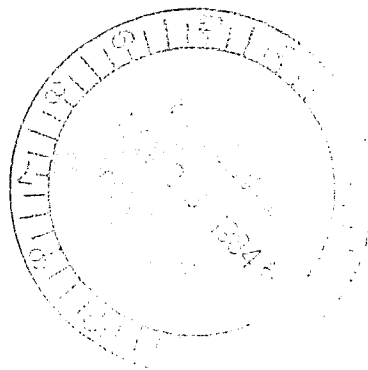

We have eliminated the entire 400-8 series, the 600-2 series and the 600-7 series.

We appreciate your interest in the quest for more health and safety in the work place and please know that we at Sikkens have accepted the philosophy of 100% compliance.

Very truly yours  
Sikkens Aerospace Finishes Division
